ToolsGroup CEO Joe Shamir Named to Leading Industry Publication's 'Pros to Know' Listing

Makes annual listing of top supply and demand chain industry professionals

CAMBRIDGE, MASS. — April ##, 2008 —ToolsGroup, a global provider of demand-driven inventory optimization solutions, announced today that CEO Joseph Shamir has been recognized by Supply & Demand Chain Executive Magazine as one of its 2008 "Pros to Know." The annual listing recognizes exceptional corporate executives at manufacturing and non-manufacturing enterprises.

"By turning the spotlight onto these outstanding Practitioner Pros to Know, we are not only recognizing their accomplishments but also offering them as role models for other executives looking to take their own organizations to a higher, more strategic level within the enterprise," said Andrew K. Reese, editor of Supply & Demand Chain Executive. "They are all truly 'Pros to Know.'"

This year, Supply & Demand Chain Executive is recognized 38 Practitioner Pros to Know, including Shamir. They comprise corporate executives at manufacturing and non-manufacturing enterprises who share a unique vision of bringing their companies' supply chains into the 21st century and have shared what they are doing to make that a reality.

According to Supply & Demand Chain Executive, Shamir and his partner, Eugenio Cornacchia, with whom he co-founded ToolsGroup more than a decade ago, were among the first supply chain professionals to apply and commercially implement advanced analytics and "stochastic optimization" techniques to achieve more efficient and robust solutions to common inventory problems faced by manufacturers, distributors and wholesalers in a range of industries. As a result, they became early pioneers of a new discipline that became known as "inventory optimization," which has now become a mainstream supply chain market in the last five years.

"I am very proud to have been recognized by Supply & Demand Chain Executive," said Shamir. "It is a privilege to be recognized for our efforts to help companies achieve the high industry standard of the 99+ percent customer service levels."
