Decy Agentic Planning Assistant

toolsgroup

Add Decy to Your Team to Realize Better Business Outcomes Faster

Decy is ToolsGroup's agentic supply chain planning assistant, designed to help planners make faster, more confident decisions while maximizing the value of their existing planning investment. By combining AI-powered guidance with deep knowledge of your supply chain data, Decy surfaces risks, explains recommendations, prioritizes actions and helps planners focus on the decisions that drive the greatest business impact.

+ Why Decy?

Supply chains have become too complex for planners to manually monitor every exception, alert and opportunity. **Decy** acts as an intelligent planning partner that continuously analyzes data, identifies what matters most and guides users from insight to action.

Rather than simply generating forecasts or reports, Decy helps organizations move from reactive planning to proactive business control.

Today	With Decy
Planners spend time finding issues	**Decy prioritizes what requires attention**
Users interpret recommendations manually	**Decy explains the business rationale**
Scenario analysis requires expert users	**Decy guides evaluation of alternatives**
Execution depends on manual follow-up	**Decy automates approved actions**

+ Key Benefits of Planning with Decy

Focus on What Matters Most

- Prioritize tasks, alerts and exceptions requiring attention
- Identify emerging risks before they become material business problems
- Allow planners to focus on higher-value activities

Understand the "Why"

- Explain system recommendations and planning outcomes
- Provide supporting evidence, context and visualizations
- Improve the trust, transparency and adoption of planning decisions

Accelerate Better Decisions

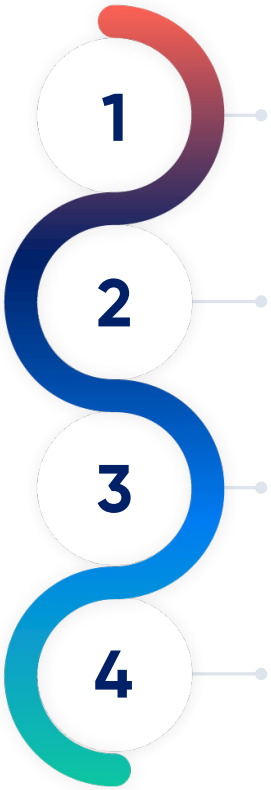

- Help users run and compare scenarios
- Evaluate alternatives and trade-offs
- Guide planners toward actions aligned with business objectives

Drive Greater Productivity

- Reduce manual analysis and investigation
- Automate routine planning activities
- Enable teams to manage increasing complexity without increasing headcount

+ How Decy Works

Decy delivers a common agentic experience in four steps:

Understands Intent

Captures the user's goals, role and current task

Assembles Context

Brings together relevant data, optimization from planning engines and business information

Explains & Guides

Generates answers, recommendations, evidence and visualizations and business information

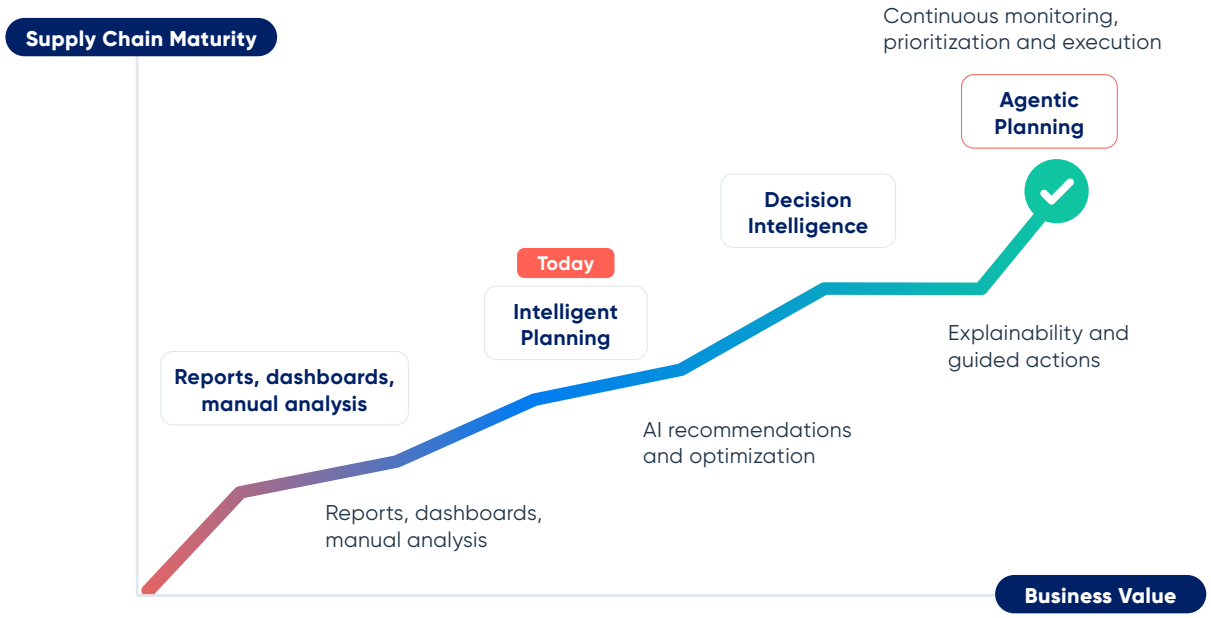

Enables Action

Allows users to review, explore, act and automate within approved guardrails

+ Decy Drives Real Business Impact

- Faster decision cycles
- Higher planner productivity
- Greater alignment
- Increased recommendation uptake
- Reduced effort on managing exceptions
- More proactive supply chain control

+ Built for Enterprise Trust

Decy operates within robust governance guardrails that control what agents can see, decide and do, turning agent behavior from "possible" into "permitted," enforcing policy before action and leaving a usable audit trail after action.

OUTCOME

Safe autonomy where risk is low; human control where impact is high, so you can trust Decy as a member of your team.

Identity & Permissions

Agents act as users with least-privilege access, with no extra rights.

Data Boundaries

Approved data only; sensitive data is blocked, masked or scoped.

Tool & Action Allow-List

Only approved tools and skills are available; everything else is denied.

Risk-Based Approvals

Low-risk actions run autonomously; high-impact actions require human confirmation.

Runtime Context Checks

Policy evaluates intent, context and limits before execution.

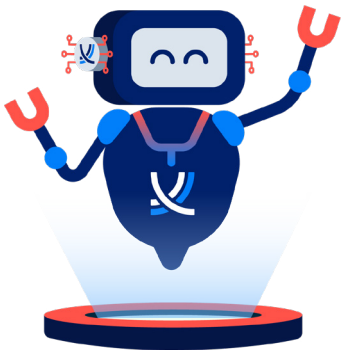

Auditability & Evidence

Records prompts, tool calls, data accessed, actions taken and approvals.

+ Become a Part of the Future of Supply Chain Planning

Decy is the first step toward ToolsGroup's vision of an autonomous, always-on planning environment. As part of the broader Decion platform, Decy helps organizations move beyond predicting outcomes toward continuously guiding and steering business performance, keeping decisions aligned with service, inventory, revenue and profitability objectives.

- **Predicting outcomes**
- **Guiding decisions**
- **Steering business performance**

+ Decy Early Adopter

PIAGGIO GROUP

> "Having a tool that helps set priorities and supports better decision-making, while increasing operational efficiency and freeing up time from more manual task so we can focus on higher value-added activities, is certainly the most striking aspect.
>
> **Simona Vivaldi**
> Planning and Procurement Manage, Piaggio Group

More control. Less risk. Promises delivered.
Always faster with Decy.
