Decy at a Glance

The agentic planning assistant that helps your team make faster, more confident decisions that achieve better business outcomes.

Decy is your AI teammate: an expert in how your ToolsGroup solution works, built right in. You focus on strategy while Decy monitors and prioritizes risks to your plan, recommends how to fix them and explains why, then executes on your strategy.

Week 1
when early adopters saw first impact

30%+
greater task efficiency using Decy

25-50%
increase in individual planner efficiency

100%
built for trust, with guardrails ensuring only positive impact

0
changes to your SO99+ subscription terms

+ How Decy Helps You

See What Matters
Surface risks and prioritize planner focus across thousands of SKUs and locations

Understand Why
Explain recommendations, trade-offs and root causes, improving decision confidence

Decide Faster
Run and compare scenarios and suggest optimal corrective actions

Execute with Control
Automate approved actions within your guardrails

+ Where Decy helps today

Manage Demand
Seasonality, exceptional demand, calendars and sales windows, super sessions, special actions, forecast aggregation, commercial overrides

Manage Supply
Inventory risk mitigation, transfers and rebalancing, order expediting, stock-to-service curves, control policies, network modeling

Run What-If Scenarios
Test the impact of parameters, simulate NPIs and assess the financial impact of options

Act for You
Complete almost any task in the system that you can do yourself, once you've chosen a strategy

+ Who benefits

Planners
Fewer manual tasks, more of the strategic work you love

Supply Chain
Fewer fires, more steering

Executives
Risk identified and mitigated before it hits the P&L
