

# Service-Driven Supply Chain Planning

**T**oolsGroup is a leading provider of cloud-based, service-driven supply chain planning automation solutions for retailers, distributors, and manufacturers. We serve the planning needs of many of the world's most recognized brands including Harley Davidson, P&G, Absolut, and Aston Martin. Our solutions help companies to meet their service-level commitments to their customers while minimizing inventory and improving planner productivity through automation.

## + Demand Planning & Sensing

Automates the optimization of demand plans using self-learning algorithms and incorporates detailed short-term demand data reducing forecast error to optimally deploy inventory.

## + Inventory Optimization

Enables management of the entire supply network as a single pool of inventory ensuring desired customer service levels are met with minimum network inventory.

## + Allocation & Replenishment

Ensures the right amount of stock is at the right place, at the right time using service-level targets, inventory policies and near real-time customer demand signals.

## + Demand & Supply Collaboration

Complements demand forecasting by bringing together data from multiple stakeholders to improve overall consensus forecast accuracy.

## + Promotions Planning

Improves promotions using machine learning to recognize shared promotional event characteristics and identifying their impact on sales.

## + S&OP

Provides the ability to make informed strategic and tactical decisions - balancing supply and demand - and implement those decisions into daily execution.

## + Production Planning

Supports the definition of demand-driven production and procurement plans across approaches including make-to-stock, make-to-order and assemble-to-order.

## Deliver Exceptional Service Profitably, Even With Uncertain Demand

Profitability is a balancing act. While others focus on forecast accuracy, ToolsGroup focuses on the ultimate goal—service-level delivery. With ToolsGroup SO99+, set your service levels and relax knowing you'll meet them with the minimum inventory investment.

**Meet service-level commitments while reducing inventory by 20-30%**

**Reduce planner workload by 50-90% with machine learning-enabled planning automation**

**Balance inventory and service, even amid extreme complexity and intermittent demand**

**React more quickly to marketplace changes by better understanding demand signals**
