ToolsGroup: **Making the Supply Chain the Force for Good**

OUR MISSION
Make the supply chain the force for good

WHAT WE DO
For retail and supply chain leaders looking to navigate uncertainty, ToolsGroup's AI-powered planning and execution solutions leverage real-time data from across the enterprise for decision making at the speed of business.

OUR VISION
Intelligent AI solutions that navigate successfully through supply chain uncertainty

Static Planning → Dynamic Planning → Guided Navigation → Autonomous Supply Chain

GLOBAL SCALE
400+ customers   **45+** countries   **~300** employees

product launches

CONFIDENTIAL

justenough.

Easiest to use end-to-end retail demand management solution

ONERA

Dynamic data intelligence platform and solutions

Inventory Hub®

Dynamic Inventory Unification Platform

JustEnough

Better forecasting with LightGBM and integration with Planalytics for weather data

SO99+

New industry-leading features focused on Forecasting & Replenishment

Aspiring to Be Your Partner in Supply-Chain Evolution

Static Planning

SO99
- Accurate forecast based on probabilistic model
- Automated AI-powered inventory management
- Fast implementation

JustEnough
- Full modular suite of retail solutions created by retailers.
- Flexibility

DCH and **SOP:**
- consolidation weekly or monthly

Dynamic Planning

Inventory Hub
Sensing internal signals to proactively respond to potential issues, avoid disruptions and improve operational efficiency.

Real-Time Retail:
Merchandising at the web speed with dynamic allocation, replenishment, fulfillment powered by inventory signals

Guided Navigation

Real time optimization with the view of financial impact powered by AI and data sensing beyond the walls of enterprise

Connect planning to execution: automate various supply chain processes, such as inventory management, transportation routing, and warehouse operations

Optimal short and long-term decision to navigate uncertainty

Customer Centric Automation

- Sense and respond to customer needs in real time!

- Enhance the capabilities of the Dynamic Data Sensing: capture IoT and consumption signals in real time

- Expand AI and probabilistic modeling to automate decisions based on the financial and customer priorities.

Building on our unique expertise in AI, Optimization, Supply Chain and Retail to make it happen
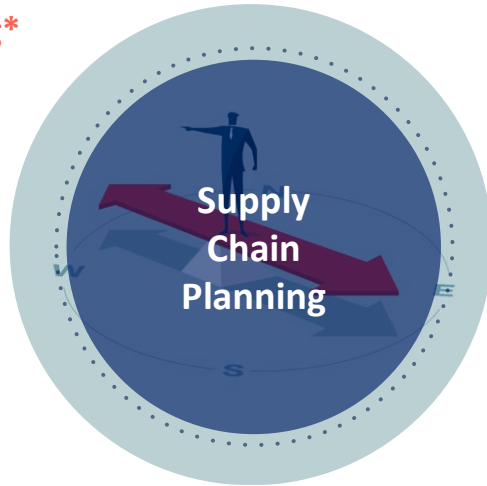

ToolsGroup Solution Suite

Predictive Forecasting

Automate the optimization of accurate demand plans

Merchandise Financial Planning

Better manage financial plans and open-to-buy budgets

Sales & Operations Planning*

Make informed strategic and tactical decisions - balancing supply and demand

Assortment Planning

Optimize and localize customer-centric product assortments

Supply Chain Planning

Allocation & Replenishment

Ensure the right amount of stock is at the right place, at the right time

Retail Demand Management

Production & Capacity Planning*

Define demand-driven production and procurement plans

Price & Promotion Planning

Increase sales and profit margin at every stage of the buying cycle

Inventory Optimization

Ensure desired customer service levels are met with minimum network inventory

Fulfillment

Lower costs and increase margins across a multi-node fulfillment network

Inventory Hub® Dynamic Inventory Unification Platform

* Solutions delivered through OEM partnerships and future product development

ToolsGroup: Focus on Customer Value

- **Global accounts management: help our customers expand across the globe**

- **New partnerships and programs to benefit our customers**
  - Production planning, order management, transportation management; Microsoft credits

- **Product: focus on usability and customer needs**
  - Explainability and new UX/UI starting with Q3
  - Continuous innovation in AI-driven optimization
  - Customer community and portal, customer input into product development

- **Technology: cloud and SaaS**
  - Common tools, data architecture and frameworks: ease of combining SO99 with retail functions
  - Modernization towards cloud-native state: improved performance and monitoring
  - Full adoption of agile development, smaller and more frequent releases

- **Global Customer Experience Team**
  - Dedicated supply chain professionals to help with post-implementation adoption, training, ad-hoc support
  - Enhanced customer support with a focus on quality of service
